

A Leading Fabricator of Precast Concrete

Our Buildings Get Noticed

High Concrete Group is one of the nation's largest producers of architectural and structural precast concrete building enclosures, and is a top producer of precast concrete parking garages. Serving customers throughout the mid-Atlantic and Midwest, we provide innovation, proven technology, and more than 60 years of experience to bring designers' architectural and structural visions to life.

Architectural Precast Products

Our enclosure systems consist of structural and non-structural precast concrete panels in configurations such as column covers, window panels and other shapes that provide an attractive, functional and durable facade. Precast insulated wall panels and insulated cladding use sandwich construction to embed a layer of rigid foam thermal insulation.

We recently introduced ThinCast®, the thinnest precast concrete rainscreen panel system available on the market. Designed for use in commercial, institutional, retail and low- to high-rise construction, this innovation provides architects with the natural beauty and character of concrete in lightweight panels that accomplish their rainscreen design goals.

Structural Precast Products

High Concrete has burnished a reputation for producing extraordinary parking garages from the standpoints of architectural design and scale. We recently began work on the Newark Airport ConRAC facility in New Jersey which is our largest contract to date. High Concrete total precast buildings provide outstanding performance for police, fire, judicial, and other institutional and military facilities.

High Concrete Group At a Glance

Year Founded: 1958

of Employees: 450

Company HQ:
125 Denver Road
Denver, PA 17517

Executive Leadership:
John "J." Seroky, President

Engineering and Design Assistance

From conception to completion, High Concrete provides extensive design and specifications assistance, connection detailing, construction scheduling and erection planning, samples, mock-ups, assembly testing, field erection finishing, and caulking as well as other services to ensure a hassle-free, high-quality installation.

Award-Winning Projects

High Concrete projects are frequently recognized by the Precast/Prestressed Concrete Institute's (PCI) annual Design Awards for excellence in precast. Recent award winners include the Statue of Liberty Museum and Screening Facility, FDNY Firehouse Rescue #2, Nassau County Police 8th Precinct, Bethpage, NY, the 1200 Intrepid office building in Philadelphia, and many others. High Concrete has also been honored with awards from the American Concrete Institute and other organizations.

High Concrete Group in the News

Our leaders are recognized industry experts. We welcome opportunities to speak, participate in moderated discussions, and are available for comment.
